Crystal Mapping

Personal and team goal setting

Benefits

Personal Development maps provide critical help to any project, career growth and team building program by helping you to develop highly skilled and successful teams and also to deliver wider benefit in terms of attracting and retaining the best people to your business, department, project team. Personal Development maps help keep your team motivated, focussed and continually learning and improving.

Solution Purpose

Crystal Mapping aims to help you successfully achieve any project, business, career, personal or life goal through identifying key actions, having a plan to achieve them and tracking progress. Crystal Mapping will help you put together project and personal development plans using a diagramming approach to visually help you establish your individual and team development needs, set appropriate goals and actions and track progress.

Crystal Maps help you to identify, communicate and manage your project goals, develop your people and teams and achieve your individual, project and business aims.

Crystal Mapping provides a comprehensive project goals setting and personal development mapping solution to cover all your needs in this area:

Personal Development Maps — Create specific maps for individuals noting the key aspects they need to focus on to achieve goals and ambitions in their professional and personal life.

Team Development Maps — Use Crystal Mapping to establish the key areas of skill and training your overall team needs to focus on in order to become a first class and highly effective team.

Team Goal Maps — Use Crystal Mapping to establish the key goals your team needs to achieve in order to deliver a successful project or outcome planning and PERTchart generation.

Intended for

It is intended for managers, team leaders and team members in all business sectors.
