Figure 3: Flowchart tools

ConceptDraw PRO makes it easy to connect objects in your drawing. You can use one of the Connectors. To connect elements using this tool, drag the connector from one connect point to another.

The Clone tool is the easiest way to place multiple copies of a shape. Select a shape, and then activate Clone tool. With each click, you will place a copy of the selection. Press Esc on your keyboard to deactivate Clone tool when you're done.

The Chain and Tree connection modes allows you to automatically connect selected objects with Connectors in a chain or tree structure.
