

CS Odessa

Deliver productive business solutions since 1993

CS Odessa sells products internationally both directly and through resellers in over 30 countries, with headquarters in Odessa, Ukraine and an established US office in San Jose, California.

Mission Statement

To design, develop and support progressive software that enables our users to work smarter and faster with individuals, teams, data, and resources through enhanced visualization tools, clear data presentation and improved collaboration capability

Computer Systems Odessa is a market leading developer of business productivity solutions for Macintosh and Windows platforms.

We have hundreds of thousands of registered users across all industries, around the world.

History

part I

1993 | **CS Odessa was founded**
A MacWorld Expo group of IT engineers from Odessa, Ukraine started developing a vector based software for making numerous business graphics, founding a company - CS Odessa

1999 | **First release of ConceptDraw**
Two years of hard coding produced a new graphic engine for vector drawing

2001 | **ConceptDraw MINDMAP**
Focused on research in the field of visual data representation, a software tool that allowed idea mind-mapping

1997 | **The start of ConceptDraw product development**
Computer Systems Odessa is a market leading developer of business productivity solutions for Macintosh and Windows platforms

2000 | **ConceptDraw was introduced at the San Francisco MacWorld Expo**
Here is where managers, mathematicians and planners get their chance to express themselves graphically

2003 | **ConceptDraw Project**
This product was developed to support the needs of our customers involved in project planning and management processes
