

ConceptDraw MINDMAP

SOFTWARE DATASHEET | VERSION 16

Professional Mind Mapping, Brainstorming, and Visual Planning Software for Windows and macOS

ConceptDraw MINDMAP is a professional mind mapping application designed to help individuals, teams, and organizations organize information, develop ideas, plan projects, and communicate complex concepts visually. It combines intuitive mind mapping tools, customizable templates, brainstorming capabilities, task management features, and presentation tools in a single environment.

Product at a glance

Platforms	Windows and macOS
Licensing	Perpetual, one-time purchase
Installations	Two computers per licensed user
Free trial	21 days, fully functional
Integration	ConceptDraw OFFICE applications
Website	www.conceptdraw.com

Key features and capabilities

Mind Mapping and Visual Organization

Create structured mind maps to organize ideas, information, tasks, and relationships. Use flexible layouts, branches, colors, icons, and hyperlinks.

Brainstorming and Idea Development

Capture ideas, organize brainstorming sessions, group related concepts, and turn initial thoughts into structured plans.

Project Planning and Task Management

Outline projects, organize work breakdown structures, identify deliverables, and prepare project plans.

Interactive Presentations

Transform mind maps into presentations, focus on individual branches, and communicate ideas without recreating content.

ConceptDraw OFFICE Integration

Exchange information with ConceptDraw DIAGRAM and ConceptDraw PROJECT for diagramming and project management workflows.

Advanced functionality

Brainstorming Mode	Dedicated brainstorming environment with a built-in timer
Multiple-Page Mind Maps	Organize large maps across interconnected pages
Automatic Topic Arrangement	Automatically position topics and branches
Map Themes and Styles	Apply consistent colors, fonts, shapes, and layouts
Hypernotes	Attach detailed notes and multiple hyperlinks to topics
Topic Filtering	Focus on selected topics, icons, notes, and project data
Task Management	Structure tasks, priorities, deadlines, and project information
Slide Navigator	Create, preview, arrange, and deliver presentations
Full-Screen Editing	Modify mind maps during interactive presentations
Solution Extensions	Expand functionality through specialized ConceptDraw solutions

System requirements

Operating systems	Windows 10/11 (64-bit); macOS 14 Sonoma, 15 Sequoia, and 26 Tahoe
Processor	Intel/AMD 1.8 GHz or faster (Windows); Intel or Apple Silicon (Mac)
Memory	4 GB minimum
Disk space	1.5 GB minimum

Business benefits

- Accelerate idea development: Capture, connect, and organize ideas visually.
- Improve productivity: Transform mind maps into documents, presentations, and project plans.
- Simplify complex information: Use visual hierarchies to navigate large amounts of information.
- Support decision-making: Compare alternatives, identify relationships, and prioritize actions.
- Improve project planning: Organize deliverables, tasks, and resources before scheduling.
- Streamline presentations: Generate slides directly from mind maps and update them as information changes.
- Protect software investments: Use perpetual licensing without mandatory subscription fees.

Licensing and deployment

ConceptDraw MINDMAP is available as a standalone application or as part of ConceptDraw OFFICE. A perpetual license allows installation on two computers for the same end user, subject to the license agreement. Volume licensing, educational pricing, and optional Maintenance Assurance are available. A fully functional 21-day trial is available for evaluation.
