

ConceptDraw PROJECT

Professional Project Management, Planning, and Resource Scheduling Software

WINDOWS · macOS · PERPETUAL LICENSE

ConceptDraw PROJECT is a comprehensive project management application designed to help project managers, teams, and organizations plan, schedule, monitor, and control projects of varying complexity.

Combining Gantt charts, task management, resource allocation, project tracking, and reporting tools, it provides an integrated environment for managing individual projects and multiple-project portfolios.

The software supports the entire project lifecycle—from initial planning and scheduling to execution, progress monitoring, and performance analysis.

Product at a glance

Product	ConceptDraw PROJECT
Current established version	PROJECT 15
Product category	Project management and scheduling
Platforms	Windows and macOS
Licensing	Perpetual, one-time purchase
Installations	Two computers per licensed user
Free trial	21 days, fully functional
Integration	ConceptDraw OFFICE applications
Website	www.conceptdraw.com

Key features and capabilities

Project Planning and Scheduling. Create structured plans with tasks, phases, milestones, deadlines, and dependencies. Use Gantt charts to visualize schedules, identify critical tasks, and monitor timelines.

Resource Management. Assign people, equipment, and materials to tasks. Monitor workloads, identify resource conflicts, and optimize allocation across projects.

Multi-Project and Portfolio Management. Manage multiple projects in a shared workspace. Coordinate dependencies, consolidate resource pools, and review progress across related projects.

Manage every stage of a project

Project Tracking and Dashboards. Monitor progress, costs, schedules, and resource utilization. Compare actual performance with baseline plans and identify deviations requiring attention.

Reporting and Cost Analysis. Generate reports covering task progress, resource assignments, costs, and project performance. Share information with project teams and stakeholders.

Advanced project management functionality

Gantt Charts	Visualize tasks, milestones, schedules, and dependencies
Critical Path Analysis	Identify activities affecting overall completion date
Project Baselines	Compare current performance with the original plan
Resource Usage Views	Monitor workloads, assignments, and availability
Multi-Project Workspace	Coordinate multiple projects and cross-project dependencies
Resource Pool	Manage shared resources across projects
Project Dashboards	Display key performance indicators and project status
One-Click Reports	Generate predefined project, resource, and cost reports
Task Filtering and Sorting	Focus on selected tasks, resources, and project information
Project Knowledge Management	Attach notes, documents, and hyperlinks to project elements
Micro Reports	Communicate task assignments and project updates by email
Custom Work Calendars	Define working schedules and resource availability

For feature details: [Official ConceptDraw PROJECT data sheet](#).

Designed for professional workflows

File compatibility and integration

Microsoft Project	Import / Export
Microsoft Excel	Import / Export and reports
MindManager	Import / Export
ConceptDraw MINDMAP	Import / Export
ConceptDraw DIAGRAM	Visual dashboards and reports
PDF	Document output
PNG	Gantt chart export
HTML	Reports
RTF	Reports

Integration with ConceptDraw MINDMAP and DIAGRAM helps teams move from initial brainstorming to project scheduling and visual reporting. Some reporting functions require the corresponding ConceptDraw application.

System requirements

Operating system — Windows	Windows 10/11, 64-bit
Operating system — macOS	macOS 14, 15, 26
Processor — Windows	Intel/AMD, 1.8 GHz or faster
Processor — macOS	Intel or Apple Silicon
Memory	4 GB minimum
Disk space	1.5 GB minimum

Check the current official system requirements for compatibility with specific operating-system builds.

Deliver projects with greater clarity

Business benefits

Improve project visibility: Maintain an overview of schedules, assignments, milestones, and progress.

Optimize resource utilization: Identify overallocated resources and balance workloads across projects.

Control project costs: Monitor expenses, budgets, and resource-related costs.

Improve planning accuracy: Analyze dependencies, critical paths, and schedule constraints.

Support informed decisions: Use dashboards and reports to identify issues and evaluate performance.

Strengthen team communication: Share task assignments, status updates, and project information.

Manage multiple projects efficiently: Coordinate project portfolios from a consolidated workspace.

Reduce long-term licensing costs: Benefit from perpetual licensing without mandatory subscription fees.

Licensing and deployment

ConceptDraw PROJECT is available as a standalone application or as part of the integrated ConceptDraw OFFICE suite.

A perpetual license permits installation on two computers for the same named user, subject to the license agreement. Volume licensing, academic and nonprofit discounts, and optional Maintenance Assurance are available. The first volume discount applies to purchases of five licenses.

A fully functional 21-day trial allows organizations to evaluate the software before purchasing.
