

## Albert Dandl

*Plant Systems Manager*

# Global Packaging Design

**Albert Dandl is a Plant Systems Manager responsible for Europe and Asia employed by a global leader in the packaging industry.**

### Industry:

Global Packaging

### Location:

Austria

### Challenge:

Analyze existing business processes and the design and development of new processes for production related information technology.

### Toolkit:

### Solution:

ConceptDraw PRO enables the visualization of information technology related concepts. ConceptDraw MINDMAP assists in gathering and organizing ideas and input, the many different topics can be arranged by company and client needs.

### Benefits:

Increase in communication speed and clarity, better alignment of internal and external projects.

Albert Dandl is a Plant Systems Manager responsible for Europe and Asia employed by a global leader in the packaging industry. With over 24,000 employees, his company is responsible for the packaging of personal and beauty care, healthcare and pharmaceuticals, food and beverage, dispensing solutions, home and garden, and media products for companies all over the world.

Based out of Austria, Mr. Dandl's company works with the most admired brands to design and manufacture solutions that meet global needs, amidst challenging and varied requirements. His organization has sales, manufacturing and converting facilities on six continents and their varied customer base can be found in over 100 countries around the world.

*"I even started to use MINDMAP for note taking during my many meetings. This has turned out to be very productive!"*

Plant Systems Manager*

Mr. Dandl is responsible for the production related information technology as it pertains to shop floor data collection, pre-press graphical systems, and CAD. As his company has offices on 6 continents with clients in over 100 countries around the world,

Albert uses ConceptDraw MINDMAP to analyze exiting business processes, draft new business workflows; all while collecting and organizing lots of input. Albert Dandl finds it necessary to communicate too many different locations, as part of his job.

Mr. Dandl states, "For me, drawing mind maps is a must. Before choosing ConceptDraw MINDMAP, I would draw out mind maps by hand. With MINDMAP, I can easily create and distribute mind maps. I even started to use MINDMAP for note taking during my many meetings. This has turned out to be very productive!"

"I then selected ConceptDraw Pro because of the easy interchangeability with Microsoft Visio files. Ever since I had moved over to a Macintosh, I was missing a strong tool for creating visual workflows for the business processes I develop. I can even interchange files between PC and Mac!" ■
